

Big plans for mega port

The \$20 billion Tuas port was officially opened yesterday, with three berths now operational. Most of the work is performed by unmanned vehicles that transport containers around the yard.

It will be able to service vessels more than

400m
in length

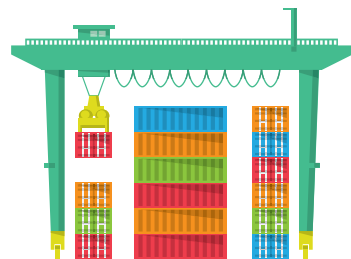

It will have a capacity of

65 million

20-foot equivalent units when fully operational, the most in the world

It costs over

\$20 billion

Total of

5 berths

to be operational by year end

500

people now working there

It should achieve net-zero carbon emissions

by 2050
