

# High jinks

Six ace pilots of the RSAF Black Knights will wow crowds with 22 manoeuvres at the Marina Barrage during the Golden Jubilee weekend. Here are some of the stunts.

## Opening: Delta Fly-By

The show begins with the six Black Knights flying past show centre in a Delta formation, before pulling up for a loop.

## Needle Cross

- The two solos approach head-on towards the crowd in a line abreast formation.
- They will then perform a derry turn into each other to converge at a central point.

## Opening Curtain

At the top of the loop, the Black Knights fan downwards for the opening curtain.

## Vertical Spiral

- One plane flies towards the crowd head-on and soars into the sky before rolling to create a spiral effect with its smoke trail.
- Another plane then pulls up and pierces the spiral with a smoke trail.

## Spear > Barrel Roll > Swan

The planes will start a barrel roll to the right, during which they will transition into a swan formation.

## Double Heart

Four planes fly in a diamond formation, pull up and split to create two hearts with their smoke trails.

## Hexa Stack > Loop > Delta

Flying in two rows of three aircraft, the Black Knights once again pull up into a loop and transit at the top of the loop into a delta formation.

## Criss-Cross

- Four Black Knights fly head-on to the crowd.
- They then turn towards each other and converge at a central point before splitting upwards and fanning out.

## Mirror Pass

The solos fly past in a mirrored stack, one inverted on top of the other.

## Dedication Pass

Four Black Knights fly across the crowd in a diamond formation while the solos spiral around their smoke trail.

## Finale Burst

All six Black Knights pull up in a delta formation and break away in an evenly spaced fan-burst.
