

# On-site centralised dishwashing facility

**1** Restaurants put their soiled crockery into boxes and trolleys.

**2** Workers collect the trolleys and take them to a centralised washing facility within the mall.

**3** Dishwashing begins. The dirty items are put on a conveyor belt where they are soaked, washed, rinsed and dried by blowing air.

**4** Workers inspect the clean crockery before packing the items.

**5** Clean crockery is delivered back to restaurants in boxes and trolleys by workers.
