

Heart-stopping moves

A Republic of Singapore Air Force AH-64D Apache helicopter and F-15SG fighter jet will perform 11 aerobatic stunts at the Singapore Airshow, including three integrated manoeuvres. Here are two of the stunts.

VERTICAL PUNCH

The AH-64D Apache helicopter enters from the right and pulls up at the show centre. It loops around and meets the F-15SG head on. The F-15SG passes it and pulls up in a sharp vertical climb.

BOW AND ZOOM

The AH-64D Apache hovers in waiting, while the F-15SG flies in from behind. The AH-64D then bows to the crowd as the F-15SG pulls up in a vertical climb. The fighter jet executes 360-degree rolls, deploying its flares simultaneously for a grand finale.

AH-64D hovering

60° bow

The RSAF AH-64D and F-15SG will perform a series of aerobatic stunts that will be among the highlights of the aerial display.
