First piece of  
debris found  
**July 29, 2015**

**6**

Debris recovered could be part  
of a Boeing-777 stabiliser  
**February 2016**

Officials removing a flaperon that washed ashore on Reunion Island in the Indian Ocean last July, more than a year after Flight MH370 went missing. The part was later found to be from the ill-fated flight.

Aircraft wreckage found off the East African coast of Mozambique last month. Australia said the piece is "almost certainly from MH370".
