

Canopy of memories

The former Tanjong Pagar Railway Station's canopy structures will be dismantled and repaired in advance and fully reinstated after the completion of Cantonment MRT station in 2025. This is to preserve the sense of heritage and memories of the old train platform area. Works on the Circle Line Cantonment MRT station will start by the year end.

1 Multiple agencies and specialists will work closely with the contractor to ensure that the affected canopy structures are sensitively treated and reintegrated with the rest of the platforms.

2 Starting from the fourth quarter of this year, the canopy structures – comprising the roof, beams and columns – will be dismantled and stored at a nearby restoration yard.

3 The structures will then be repaired and restored. They will be reinstated with reconstructed platform slabs in 2025 after the Cantonment MRT station has been completed.

- Tanjong Pagar Railway Station is open to the public every public holiday this year until Christmas Day.
- The railway station will be closed from Dec 26 until the completion of Cantonment MRT station in 2025.
