Pyongyang's missile arsenal

Operational | Flight tested | In development or untested

	Hwasong-5	Hwasong-6	Hwasong-7	KN-11	KN-15	No-dong	Musudan BM-25	Hwasong-12	KN-08	Taepodong-2
Class	SRBM	SRBM	SRBM	SLBM	MRBM	MRBM	IRBM	IRBM	ICBM	ICBM
Payload (kg)	1,000	700	500	Unknown	Unknown	250-700	650	650	300-700	1,000-1500
Range (km)	300	500	800-1,000	1,200 (Flew a record 500km on Aug 24, 2016)	1,200-2,000	1,200-1,500	2,500-4000	4,500	5,500-11,500	4000-15,000 (Has so far been used only to launch satellites into orbit. There is no consensus on whether it is capable of delivering a nuclear device or significant payload)

Note: SRBM stands for short-range ballistic missile. SLBM stands for submarine-launched ballistic missile. MRBM stands for medium-range ballistic missile. IRBM stands for intermediate-range ballistic missile. ICBM stands for intercontinental ballistic missile.
