

Fun for the family

Widest, tallest, longest: Here are five slides that stand out.

- 1** The Family Slide is the widest slide in a public park here. Up to four adults can slide together with children at a gradual, safe speed.

- 2** The Curved Roller Slide, at 34m long, is Singapore's longest outdoor slide in a public park. It has gentle curves and is lined with black tubes – like a conveyor belt – for easy sliding.

- 3** The longest and tallest tube slide in a public park here is the Double Barrel Slide with Net Climber, with two 23m-long tubes that go up 9m high. Children can climb all the way up the slide using the net climber in between.

- 4** The Waterfall Climber allows users to follow the contours of the existing terrain, with a curved slide and a net intertwined into one.

- 5** Motion-sensor LED lights mean fun for the children on the High Adventure Roller Slide. The colours and intensity of the lights change as children roll down the straight 32m slide.
