

Cooler uniform for SAF troops

Soldiers in army combat units have a new hybrid uniform that reduces the risk of heat injury during outfield training

OLD

NEW

Designed to be worn with a soldier's integrated load-bearing vest

DIFFERENCES

Sleeves use standard No. 4 pixelised uniform fabric, torso area uses flame-resistant synthetic material

Absorbs perspiration and dries 60 per cent more quickly than the No. 4 uniform

Porous construction that allows better air circulation, 40 per cent more permeable than No. 4
