

**A solution  
to maintain  
community  
harmony  
without  
the need to  
ban smoking  
in homes:**

**When your neighbour lights up  
and deadly second-hand smoke  
drifts into your unit...**

**...you close your windows  
and turn on the air-con.**

**At the end of each month, your smoker neighbour  
has to foot your electricity bill.**
