

# At a glance: Standard price plans

## Fixed price plan

Mr Ong and his family prefer to keep their electricity bills stable so as to better manage their overall household expenses. As such, they have chosen to sign up for a fixed price plan at a rate and contract duration that they are comfortable with, after looking at tariff rates in the past.

The family will pay a constant rate (for example, 20 cents/kWh) throughout the contract duration. They should take note that the rate that retailers offer may be higher or lower than the regulated tariff.

## Discount off the regulated tariff plan

Mr Tan and his family do not mind having electricity rate changes every quarter so long as it is lower than the regulated tariff. As such, they have chosen the discount off the regulated tariff plan as they can enjoy savings regardless of the tariff rate.

The family will enjoy a fixed discount off the prevailing regulated tariff (for example, 5 per cent) throughout the contract duration. The regulated tariff is reviewed by SP Group quarterly, and approved by EMA.
