

# Different policies, different outcomes

How tougher climate policies could fuel growth of renewables in Asean

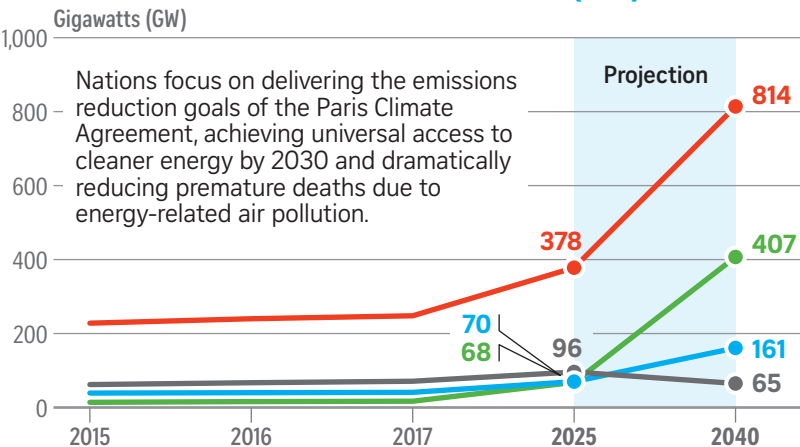

## Power generation capacity

- Total
- Coal power
- Hydropower
- Non-hydropower renewables (for example, wind, solar, biomass and geothermal power)

### INTERNATIONAL ENERGY AGENCY (IEA) NEW POLICIES SCENARIO (NPS)

### IEA SUSTAINABLE DEVELOPMENT SCENARIO (SDS)

Non-hydropower renewables' contribution to the total power generation under the two scenarios (projected)

	NPS		SDS	
	2025	2040	2025	2040
	11.5%	20.9%	18%	50%

NOTE: One gigawatt (MW) is equivalent to one billion watts. Figures for oil, gas and nuclear power generation are not included.
