

Downloads, uploads, which telco is the fastest?

4G DOWNLOAD SPEEDS: THE FINDINGS

StarHub and Singtel are generally the fastest in underground MRT stations and road tunnels, while Singtel is fastest in most of the malls, according to a Straits Times test. Download speeds affect how quickly one can surf the Internet and the quality of mobile videos

How we tested:

1. Have four identical smartphones each on a different 4G network.
2. Go to different locations in a building, road tunnel or underground MRT platform.
3. At each location, use the OpenSignal app to measure download and upload speeds.
4. Record the median result to eliminate outliers in the data.
