

More space for Alexandra Hospital

The hospital's current site boundary will expand from 12.2ha to an estimated 13.1ha when the masterplan for redevelopment is completed.

The Alexandra Campus will be brought closer to Queensway for better accessibility, with seamless connectivity to adjacent residential clusters and the rail corridor.

The redeveloped campus will preserve the hospital's history and heritage. The conserved Blocks 1, 2 and 6 will retain their prominence and setting.
