

Please stay home, urge doctors

By staying home, you have less chance of getting infected. And if you are infected, you have less chance to spread it.

Professor Wang Linfa,
director of the emerging
infectious diseases
programme at Duke-NUS
Medical School.

Many people are infected and infectious before they develop symptoms. To protect others, you should try to minimise contact.

Associate Professor Alexander Cook,
vice-dean for research at
National University of
Singapore's Saw Swee
Hock School of
Public Health.

Avoid social gatherings beyond your immediate family. If all of us can do this, we will succeed in overcoming the virus.

Professor Tan Chorh Chuan,
chief health scientist
at the Ministry
of Health.
