SILVER MEDAL

Inside The Istana

Readers can go on a "flying tour" of the Istana's iconic main building in this multimedia project and explore unusual spots on its sprawling grounds that are not usually open to the public. The interactive graphic was put together with the use of immersive storytelling features, including augmented reality, audio recordings and 360-degree video.

BRONZE MEDAL

HK-Beijing high-speed rail: A journey up north

This interactive graphic takes readers along the nine-hour, 2,439km journey from Hong Kong's newest West Kowloon terminus to Beijing on China's national high-speed rail network. Readers can explore the sights and stories of China and experience what it is like on board the fast train.

On a little street in Singapore... a road map of history, culture and society

In this data-driven project, readers can dive into Singapore's past and see how its colourful history has been quietly preserved in the names of its streets. Readers can explore a map and zoom in on some of the streets in their neighbourhoods to uncover interesting details of their origins and other surprising references.
