

# Resuming worksite activities safely

## WHAT IS GOOD

Segregating workers into separate teams and zones

Provision of individually packed meals

Use of the SafeEntry check-in system and temperature screening

Providing hand sanitiser at accessible points

## WHAT IS BAD

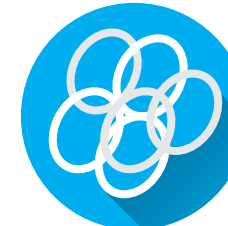

Not providing a sick bay on site

Not appointing a safe management officer

Workers without masks

Not using visual markers – such as coloured bands – to segregate different teams

## IN NUMBERS

200

Number of safety assessors

3,000

Construction sites assessed to date

170

Stern warnings issued so far

1,000

Average number of worksite assessments conducted per week

8.5%

Proportion of worksites with inadequacies in safe management measures, down from **10%** in August

70

Safety time-outs issued so far
