

Going direct to the Internet safely

HOW REMOTE BROWSING TECHNOLOGY WORKS

At the end point

- No web content is executed
- Thus malware is unlikely to be executed
- Reduces risk of data exfiltration

KEY FEATURES OF SECURE INTERNET SURFING

Safe surfing

1 Surf the Internet for information and multimedia content (video, images and text)

2 Open Internet links direct from Outlook and documents

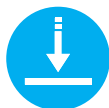

3 Log in to social media, read feeds, and make text-only posts (no image/video upload)

4 Copy-paste information to and from the Internet

5 Download content from the Internet

6 Upload files on approved Internet websites, such as gov.sg websites
