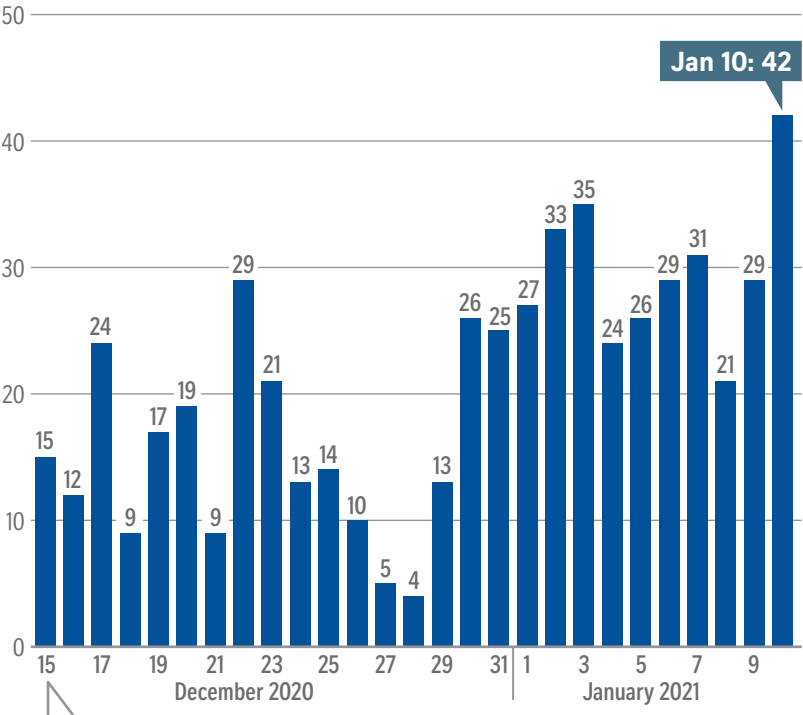
Covid-19 infections on the rise in Singapore

The number of imported and community cases has started to creep up over the past month, as more Singapore residents return and more are out and about under phase 3 of Singapore's reopening. **Timothy Goh** breaks down the data.

IMPORTED CASES



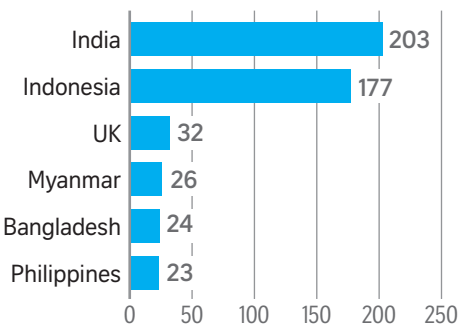
The first time Singapore recorded double-digit imported cases since 12 cases were reported on Dec 8.

In October and November, daily imported case numbers remained mostly in the single digits.

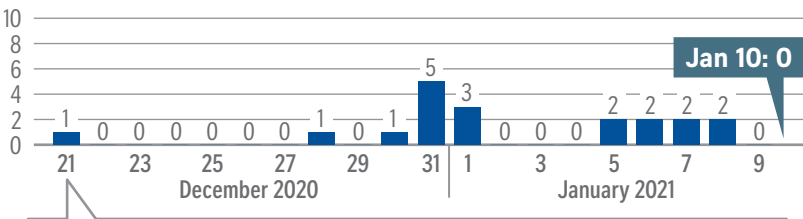
562 Total imported cases from Dec 15 to Jan 10

31 Number of countries which imported cases came from since Dec 15

Top 6 countries where imported cases came from



COMMUNITY CASES



The date the first community case was reported here since Dec 5.
