

# Bad air day

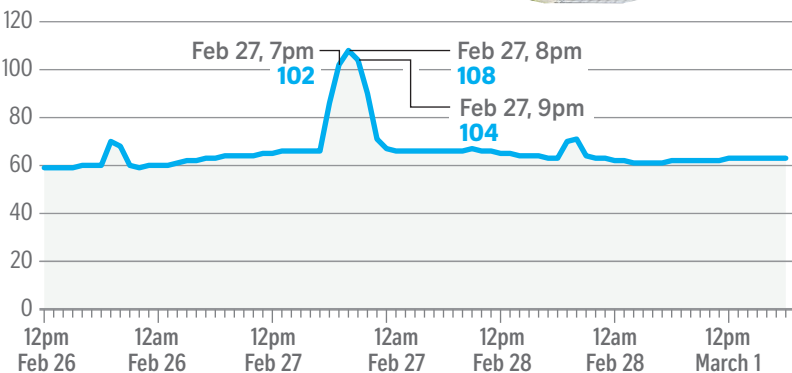

Air quality in the northern part of Singapore climbed to unhealthy levels on Saturday evening due to a spike in ozone levels. The Straits Times highlights data from the north.

## PSI range

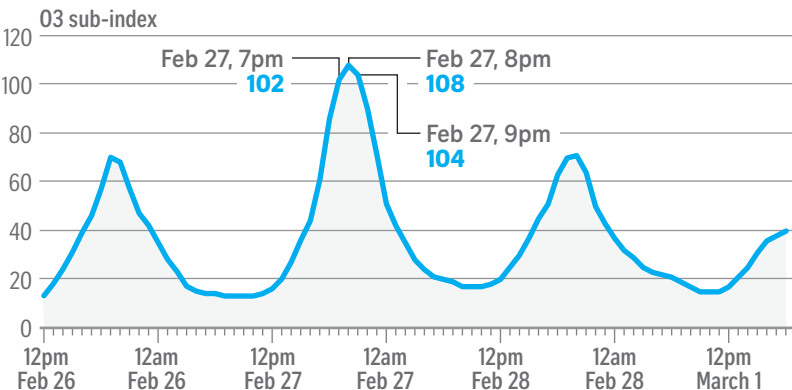

PSI value	Air quality descriptor
0-50	Good
51-100	Moderate
101-200	Unhealthy
201-300	Very unhealthy
Above 300	Hazardous

## PSI levels from Friday to Monday in the north

## Ozone (O3) levels from Friday to Monday in the north

## Concentration of fine particulate matter (PM2.5) from Friday to Monday in the north
