

Getting to net zero by 2050

Achieving net-zero emissions by 2050 is a monumental but critical task, says the International Energy Agency. It will require nothing short of the complete transformation of the global energy system, and key to this is meeting a series of milestones over the next three decades.

■ Buildings ■ Transport ■ Industry ■ Electricity and heat ■ Other

Gigatonnes of CO₂ produced per year

*Plant has not invested in abating tech such as carbon capture and storage
