

# LIVING WITH COVID-19

## Key points in the next steps in Singapore's pandemic response

- Greater use of community care facilities rather than hospitals
- Shorter stays in hospitals and community care facilities
- Home quarantine instead of staying at government facilities
- All households to get DIY Covid-19 test kits
- Vaccinated individuals travelling to safe countries could serve a shorter seven-day SHN at home

## The Big Story A2-11; More Parliament reports BI-3

More vaccinated people with Covid-19 will go directly to community care facilities, such as D'Resort @ Downtown East, instead of hospitals.
